

9. Be tried for a crime only once.
10. Receive neither cruel nor unusual punishment if you are convicted of a crime and sentenced.

NOTE!!!: These rights are for after you are arrested, and do not include the reading of the rights, etc. If these rights are violated in ANY way, that may be cause for a mistrial, or even total release.

169. How The Law Protects Juvenile Offenders by Exodus

Juveniles accused of breaking the law are granted some special rights intended to protect them, because of their age. If a juvenile is charged with a crime punishable by a term in a reform school or juvenile detention facility, he is assured the right to:

1. Remain silent, and not incriminate himself/herself.
2. Be placed in quarters separate from adult offenders while being held in custody.
3. Be notified before a hearing of the charges against him.
4. Be released to his parents or guardians after signing a written promise to appear at his trial (unless the child is likely to run away and not come back to court unless he is dangerous or may himself be in danger if sent back home).
5. Be tried at proceedings that are closed to the public.
6. Have a record of the proceedings made, in case one is needed for a future appeal.
7. Be represented by a lawyer.
8. Have a lawyer appointed by the court if he cannot afford one.
9. Confront his accusers.
10. Have his lawyer cross-examine witnesses.

Again, these rights are for after you have been arrested.

170. Down the Road' Missile by Exodus

This missile is aptly named because it travels best down a street or road. This is nothing more than harmless fun intended to scare the living shit out of oncoming cars.

How To Make A Missile

All you need are:

- Hairspray can, or something else with flammable propellant (don't use spraypaint dipshit, it makes a big mess!)
- book of ordinary matches
- tape (clear if possible, it's thinner)
- BB or pellet gun (use BB's if possible)

Instructions:

Tape the book of matches to the bottom of the can, y'know, the CONCAVE part. You might want to arrange the matches so that they are spread over a wide area of the bottom of the can, but close together.

Shake the can up vigorously. Now place the can on its side with the nozzle of the can pointed in the direction you want it to go, down a road, off a ramp, at your sister, etc.. Now stand back a bit, and shoot at the matches. It should take off at about 30 ft per sec!! What happens in case you couldn't tell, is the BB hits the matches and causes a spark, and at roughly the same time, punctures the weak bottom of the can. As the propellant sprays out, it hopefully comes in contact with the spark, and presto. If you don't do it right you'll blow a lot of money because each can only be used once, so experiment to find best results.

In The Air Missile:

Compile the rocket as stated before, and put it vertical on a stand of some sort with the bottom accessible. Place a section of PVC pipe 95° preferred and shoot into the PVC pipe which should direct the BB upward, and the can should take off. Experiment w/ different cans, it's hard to find ones that work perfectly, and still go higher than 30 ft.

171. Phun With Shotgun Shells by Exodus

This phile is for those who have no concern for themselves or the person they wanna fuck over with this. (in short, a fucking MANIAC!!!)
